Simplify Hand Hygiene Compliance

with Skin Care Solutions from GOJO.

For European Markets Only

**GOJO Hygiene Management Programme
for Food Processing Facilities**

Opportunities for **cross contamination** are everywhere.

The spread of ***spoilage organisms*** and ***environmental pathogens*** can impact your facility:

- Plant shut-down due to contaminated product
- Product is unsuitable for sale
- Loss of reputation, and brand damage
- Loss of customer loyalty

Ultimately costing time, money, reputation... and customers!

Did you know?

Bulk hand soap can contribute to the ***cross contamination problem***.

- Bulk soap dispensers are open to the environment and can compromise your HACCP programme.
- As it isn't always practical for maintenance personnel to properly clean and sanitise dispensers each time they are refilled, bacteria will grow inside.
- **Germ**s may spread to unsuspecting users, putting your employees, product and business at risk.

A study,¹ conducted by microbiologists at the University of Arizona, found that **25% of bulk soap dispensers** contain soap with unsafe levels of bacteria.

Is it worth the risk?

GOJO

GOJO is working with

Simplifies Compliant Hand Hygiene

The GOJO Hygiene Management System...

- Simplifies a complex landscape of products, regulations and worker compliance issues
- Is a comprehensive programme that includes effective products and dispensing systems people will use
- Is a simple, hassle-free system complete with compliance-building tools that are easy to implement

the Food Processing industry to help solve worker compliance issues.

- Performance guaranteed
- Suitable for wash down areas
- Refills made with the new GOJO SMART-FLEX™ Technology Patent-Pending
- GOJO Controlled Collapse Bottles are engineered to hold their shape while emptying, for a more attractive appearance Patent-Pending
- Removable pump promotes convenient recycling

PURELL and GOJO LTX-7™ & LTX-12™ Touch-Free Dispensers

- Large sight window, skylight and clear bottles make it easy to know when to change the refill
- Open the cabinet via side latches or, by removing the key, make it a lockable cabinet Patent-Pending
- GOJO Controlled Collapse Bottles are engineered to hold their shape while emptying, for a more attractive appearance. Patent-Pending
- Removable pump promotes convenient recycling.
- 1200ml SANITARY SEALED high-capacity PURELL and GOJO refills
- Dispenser turns off automatically when opened
- Product dispensed via sensor
- LED light indicator to show when dispenser ready, if there is a refill issue, or when there is insufficient power
- Performance guaranteed
- Refills made with the new GOJO SMART-FLEX™ Technology

SANITARY SEALED™ Refills are *SAFE, SMART and SIMPLE*

SAFE:

The product inside is protected from contamination because it is factory sealed and includes a fresh valve with each refill.

SMART:

The logical choice for helping prevent the spread of germs.

SIMPLE:

Virtually labour free: insert a new refill into a PURELL or GOJO dispenser in seconds.

Hand hygiene is an important part of food processing.

Opportunities for cross contamination are everywhere. If just one employee doesn't follow proper hand hygiene procedures that employee could put your whole facility at risk.

The complete hand hygiene regime available

Products that balance efficacy and skin mildness with the brands that people know and trust.

GOJO® Antibacterial Foam Soap*

- Suitable for frequent washing
